ABOUT ME

I am currently pursuing a Diploma in Information Technology Engineering at Ganpat University. I have applied my skills in tools such as Adobe XD, HTML, and CSS through various academic projects. In addition, I have a keen interest in HTML, Java, PHP, MySQL , Bootstrap5. which has helped me build a strong foundation in both technical and administrative tasks. I am passionate about learning and continuously improving my skills to prepare for a successful career in the IT field. I actively participated in coding competitions, which helped sharpen my problem-solving abilities and strengthened my teamwork skills. My internships at tech startups provided valuable experience in software development and deepened my understanding of agile methodologies. I have experience in data entry and account management and am eager to contribute to innovative, user-centered projects. With a solid foundation in computer science and a passion for continuous learning, I am ready to take on new challenges and grow within the tech industry.

- Crafted interactive user interfaces with Adobe XD, HTML, CSS ensuring seamless user experiences
- Employed Bootstrap5 and CSS frameworks for responsive and consistent designs across devices
- Contributed to the end-to-end development process, focusing on frontend aspects while maintaining project timelines
- Actively engaged in learning and development, leveraging intern experience to enhance skills and knowledge in frontend development

ACADEMIC PROJECTS

Quiz Management Website

Quiz Management System is a web-based quiz system; a system that can be used by lecturers to evaluate students effectively, efficiently and perfectly. The purpose of the Online Quiz System is to save the lecturer's time since the answers are automatically marked. The Online Quiz System is developed by using a rule-based algorithm. We are using PHP, HTML and JQuery Tools and Technology.

E- Commerce Website

Developed a user-friendly E-commerce website using HTML, CSS, and JavaScript, ensuring a seamless shopping experience. Integrated secure payment methods and efficient inventory management for smooth transactions. The straightforward design enhances customer satisfaction, fostering business growth through an accessible and enjoyable online platform.

Unused Medicine Donation System

The aim and object of this project are to prepare an online portal for the collection of unused medicines so we can be given to the people who are in need.

EDUCATION & CER TIFICATIONS

Diploma in Information Technology   I have been studying since 2023

Frontend Development, Backend Development, HTML, CSS, JavaScript, MySQL, C++, Data Structures and Algorithms, Computer Networking, Cloud Computing, Account Management, Data Entry.

10th   June 2022 - March 2023

Panchamrut International Public School Ahmedabad, Gujarat, India
